Ref. No. ISO 710/II-1974 (E)

Descriptors : geology, maps, drawings, transverse sections, sedimentary rocks, symbols, graphical symbols.

Price based on 7 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 82 has reviewed ISO Recommendation R 710/II and found it suitable for transformation. International Standard ISO 710/II therefore replaces ISO Recommendation R 710/II-1968.

ISO Recommendation R 710/II was approved by the Member Bodies of the following countries :

Belgium	Greece	Poland
Brazil	Hungary	Portugal
Chile	India	South Africa, Rep. of
Czechoslovakia	Italy	Spain
Egypt, Arab Rep. of	Japan	Sweden
France	Korea, Rep. of	Turkey
Germany	Netherlands	U.S.S.R.

The Member Bodies of the following countries expressed disapproval of the Recommendation on technical grounds :

New Zealand*
Yugoslavia

The Member Body of the following country disapproved the transformation of ISO/R 710/II into an International Standard :

Poland

Other documents in this series on graphical symbols for use on detailed maps, plans and geological cross-sections include :

Part I : *General rules of representation.*

Part III : *Representation of magmatic rocks.*

Part IV : *Representation of metamorphic rocks.* (In preparation.)

Part V : *Representation of minerals.* (In preparation.)

* Subsequently, this Member Body approved the Recommendation.
