Liquefied anhydrous ammonia for industrial use — Sampling — Taking a laboratory sample

Ammoniac anhydre liquéfié à usage industriel — Échantillonnage — Prélèvement d'un échantillon pour laboratoire

First edition — 1982-12-01

Corrected and reprinted — 1983-03-15

UDC 661.51 : 620.11 : 543.05

Ref. No. ISO 7103-1982 (E)

Descriptors : industrial products, ammonium compounds, sampling.

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7103 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in July 1981.

It has been approved by the member bodies of the following countries :

Austria	India	Poland
Belgium	Italy	Portugal
Brazil	Korea, Dem. P. Rep. of	Romania
Czechoslovakia	Korea, Rep. of	South Africa, Rep. of
Egypt, Arab Rep. of	Mexico	Switzerland
France	Netherlands	Thailand
Germany, F. R.	New Zealand	USSR
Hungary	Philippines	

The member body of the following country expressed disapproval of the document on technical grounds :

United Kingdom

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
