Chairs with tilting or reclining mechanisms when
fully reclined, and rocking chairs

Chaises — Détermination de la stabilité —

*Partie 2: Chaises inclinables ou avec mécanisme d'inclinaison complète
jusqu'en position de chaise longue, et chaises à bascule*

Reference number
ISO 7174-2:1992(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7174-2 was prepared by Technical Committee ISO/TC 136, *Furniture*, Sub-Committee SC 1, *Test methods*.

ISO 7174 consists of the following parts, under the general title *Furniture — Chairs — Determination of stability*:

- *Part 1: Upright chairs and stools*
- *Part 2: Chairs with tilting or reclining mechanisms when fully reclined, and rocking chairs*

Annex A of this part of ISO 7174 is for information only.
