

INTERNATIONAL STANDARD

ISO
7187

Second edition
1995-12-15

Photography — Materials for direct-positive colour-print cameras — Determination of ISO speed

*Photographie — Surfaces sensibles pour appareils photographiques
donnant directement une épreuve positive en couleur — Détermination de
la sensibilité ISO*

Reference number
ISO 7187:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7187 was prepared by Technical Committee ISO/TC 42, *Photography*.

This second edition cancels and replaces the first edition (ISO 7187:1983), which has been technically revised to include several new definitions (clause 3) and a distinction between speed, ISO speed and ISO speed of a product (clause 6).

Annex A of this International Standard is for information only.
