Polytetrafluoroethylene (PTFE) tubing for aerospace applications — Methods for the determination of the density and relative density

Tubes en polytétrafluoréthylène (PTFE) à usage aéronautique — Méthodes de détermination de la masse volumique et de la densité

First edition — 1984-06-15

UDC 621.643.29 : 629.7 : 531.75

Ref. No. ISO 7258-1984 (E)

Descriptors : aircraft industry, plastic tubes, tests, determination, density (mass/volume).

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7258 was developed by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, and was circulated to the member bodies in December 1981.

It has been approved by the member bodies of the following countries :

Australia	Czechoslovakia	Romania
Austria	Egypt, Arab Rep. of	South Africa, Rep. of
Belgium	France	Spain
Brazil	Germany, F.R.	Sweden
Canada	Italy	United Kingdom
China	Netherlands	USA

No member body expressed disapproval of the document.
