

INTERNATIONAL STANDARD

**ISO
7319**

Second edition
1992-12-15

Aerospace — Fluid systems — Interface of 24° cone metric couplings

*Aéronautique et espace — Systèmes de fluides — Interface des
raccordements métriques à cône de 24°*

Reference number
ISO 7319:1992(E)

ISO 7319:1992(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7319 was prepared by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, Sub-Committee SC 10, *Aero-space fluid systems and components*.

This second edition cancels and replaces the first edition (ISO 7319:1982), the figure of which has been technically revised.

Annex A of this International Standard is for information only.
