UDC 621.86.065.4

Ref. No. ISO 7592-1983 (E)

Descriptors : chains, chain-blocks, utilization, inspection, instructions.

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7592 was developed by Technical Committee ISO/TC 111, *Round steel link chains, lifting hooks, and accessories*, and was circulated to the member bodies in July 1982.

It has been approved by the member bodies of the following countries:

Australia	Germany, F.R.	Romania
Austria	India	South Africa, Rep. of
Belgium	Ireland	Spain
Canada	Japan	Sweden
Czechoslovakia	Korea, Rep. of	United Kingdom
Egypt, Arab Rep. of	Netherlands	USSR
France	Poland	

No member body expressed disapproval of the document.
