

INTERNATIONAL STANDARD

ISO
7643

Second edition
1991-07-15

Caravans and light trailers — Trailers of categories O₁ and O₂ with overrun brakes — Linear bench test methods for brake controls

*Caravanes et remorques légères — Remorques des catégories O₁ et O₂
à freins à inertie — Méthodes d'essai des dispositifs de commande de
freinage sur banc linéaire*

Reference number
ISO 7643:1991(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7643 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Sub-Committee SC 4, *Caravans and light trailers*.

This second edition cancels and replaces the first edition (ISO 7643:1983), certain values of which have been altered and references updated.
