
Chemistry — Layouts for standards —
Part 2:
Methods of chemical analysis

Chimie — Plans de normes —

Partie 2: Méthodes d'analyse chimique

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 78-2 was prepared by Technical Committee ISO/TC 47, *Chemistry*, Subcommittee SC 1, *General methods*.

This second edition cancels and replaces the first edition (ISO 78-2:1982), which has been revised to reflect changes in Part 3 of the ISO/IEC Directives.

ISO 78 consists of the following parts, under the general title *Chemistry — Layouts for standards*:

- *Part 2: Methods of chemical analysis*
- *Part 3: Standard for molecular absorption spectrometry*
- *Part 4: Standard for atomic absorption spectrometric analysis*

NOTE Part 1 was planned but never published.

Annex A forms an integral part of this part of ISO 78. Annexes B and C are for information only.
