Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7830 was developed by Technical Committee ISO/TC 42, *Photography*, and was circulated to the member bodies in January 1983.

It has been approved by the member bodies of the following countries :

Australia
Belgium
Czechoslovakia
Denmark
France

Germany, F. R.
Italy
Japan
Mexico
Poland

South Africa, Rep. of
United Kingdom
USA

No member body expressed disapproval of the document.
