ISO
7918

Second edition
1995-10-01

Forestry machinery — Portable brush- cutters and grass-trimmers — Cutting attachment guard dimensions

*Matériel forestier — Débroussailleuses et coupe-herbe portatifs —
Dimensions du protecteur du dispositif de coupe*

Reference number
ISO 7918:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7918 was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 17, *Manually portable forest machinery*.

This second edition cancels and replaces the first edition (ISO 7918:1985), which has been extended to include guards for types of blades other than circular saw-blades, as well as cutting attachment guards for other brush-cutters and grass-trimmers.

Annex A of this International Standard is for information only.
