## **Stationary source emissions — Determination of the mass concentration of sulfur dioxide — Performance characteristics of automated measuring methods**

*Émissions de sources fixes — Détermination de la concentration en  
masse de dioxyde de soufre — Caractéristiques de performance des  
méthodes de mesurage automatiques*

Reference number  
ISO 7935:1992(E)

## Contents

|                                                                                 | Page |
|---------------------------------------------------------------------------------|------|
| 1 Scope .....                                                                   | 1    |
| 2 Normative references .....                                                    | 2    |
| 3 Definitions .....                                                             | 2    |
| 4 Description of the automated measuring systems .....                          | 3    |
| 5 Numerical values of performance characteristics and their applicability ..... | 4    |

## Annexes

|                                                                                          |    |
|------------------------------------------------------------------------------------------|----|
| A Determination of main performance characteristics of automated measuring systems ..... | 6  |
| B Additional performance characteristics .....                                           | 10 |
| C Bibliography .....                                                                     | 11 |
