Second edition
1994-08-01

Pulps — Determination of saleable mass in lots —

Part 1:

Pulp baled in sheet form

Pâtes — Détermination de la masse marchande des lots —

Partie 1: Balles de pâte en feuilles

Reference number
ISO 801-1:1994(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 801-1 was prepared by Technical Committee ISO/TC 6, *Paper, board and pulps*, Subcommittee SC 5, *Test methods and quality specifications for pulp*.

This second edition cancels and replaces the first edition (ISO 801-1:1979), of which it constitutes a technical revision.

ISO 801 consists of the following parts, under the general title *Pulps — Determination of saleable mass in lots*:

- *Part 1: Pulp baled in sheet form*
- *Part 2: Pulps (such as flash-dried pulps) baled in slabs*
- *Part 3: Unitized bales*

Annexes A and B of this part of ISO 801 are for information only.
