Thermal insulation — Mineral wool mats for ventilated roof spaces —

Part 1:

Specification for applications with restricted
ventilation

*Isolation thermique — Feutres en laine minérale pour sous-toitures
ventilées —*

*Partie 1: Spécifications pour application dans des conditions de ventilation
restreinte*

Reference number
ISO 8144-1:1995(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8144-1 was prepared by Technical Committee ISO/TC 163, *Thermal insulation*, Subcommittee SC 3, *Insulation products for building applications*.

ISO 8144 consists of the following parts, under the general title *Thermal insulation — Mineral wool mats for ventilated roof spaces*:

- *Part 1: Specification for applications with restricted ventilation*
- *Part 2: Specification for horizontal applications with unrestricted ventilation*

Annexes A, B and C form an integral part of this part of ISO 8144. Annexes D, E and F are for information only.
