Modular units for machine tools — Workholding pallets —

Part 1: Workholding pallets up to 800 mm nominal size

Éléments standards pour machines-outils — Palettes —

Partie 1: Palettes porte-pièce de dimension nominale jusqu'à 800 mm

Reference number
ISO 8526-1 : 1990 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8526-1 was prepared by Technical Committee ISO/TC 39, *Machine tools*.

ISO 8526 consists of the following parts, under the general title *Modular units for machine tools — Workholding pallets*:

- *Part 1: Workholding pallets up to 800 mm nominal size*
- *Part 2: Workholding pallets of nominal size greater than 800 mm*

Annex A forms an integral part of this part of ISO 8526. Annex B is for information only.
