
**Agricultural wheeled tractors —
Front-mounted equipment —**

Part 2:
Stationary equipment connection

*Tracteurs agricoles à roues — Équipement monté à l'avant —
Partie 2: Dispositif de liaison des équipements fixes*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8759-2 was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 4, *Tractors*.

This second edition of ISO 8759-2 is a complement to ISO 8759-1:1998, which is itself a technical revision of ISO 8759:1985 and ISO 8759-2:1985.

ISO 8759 consists of the following parts, under the general title *Agricultural wheeled tractors — Front-mounted equipment*:

- *Part 1: Power take-off and three-point linkage*
- *Part 2: Stationary equipment connection*
