Financial transaction cards — Messages between the integrated circuit card and the card accepting device —

Part 1: Concepts and structures

*Cartes de transactions financières — Messages entre la carte à circuit intégré et le
dispositif d'acceptation des cartes —*

Partie 1: Concepts et structures

Reference number
ISO 9992-1 : 1990 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9992-1 was prepared by Technical Committee ISO/TC 68, *Banking and related financial services*.

ISO 9992 consists of the following parts, under the general title *Financial transaction cards — Messages between the integrated circuit card and the card accepting device*:

- *Part 1: Concepts and structures*
- *Part 2: Functions*
- *Part 3: Messages (commands and responses)*
- *Part 4: Common data for interchange*
- *Part 5: Data elements*

Annex A of this part of ISO 9992 is for information only.
