Risk management — Guidance for the implementation of ISO 31000

bsi.

...making excellence a habit.™

National foreword

This Published Document is the UK implementation of ISO/TR 31004:2013.

The UK committee recognizes that ISO/TR 31004 has been developed in response to the need for additional guidance on the implementation of ISO 31000:2009 – *Risk management – Principles and guidelines*. The UK committee further recognizes this document's status as a Technical Report (TR). A TR is defined by ISO as "data of a different kind from that which is normally published as an International Standard". A TR is "entirely informative in nature" and does not "contain matter implying that it is normative" (ISO/IEC Directives, Part 1, Consolidated ISO Supplement, 2013).

In order to take advantage of material that has been drafted in committee so far, the ISO committee wished to publish this guidance as a TR at this stage, so as to offer guidance to organizations on ISO 31000. The report contains material that will be useful for organizations implementing ISO 31000.

The UK participation in its preparation was entrusted to Technical Committee RM/1, Risk management.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
